

## Analyst – Decentralised Energy

### Edinburgh, UK

**Decentralised energy is one of the fastest growing and dynamic low carbon market segments in the world today. Here is an opportunity for you to build a great career in this sector.**

**Who we are:** Delta Energy & Environment, established in 2005, is an enterprising and rapidly growing research and consulting company that provides commercial insight and market expertise in:

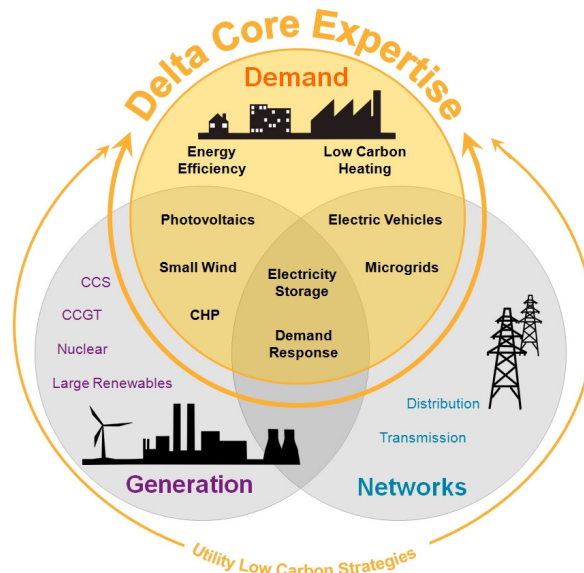

- ▶ Decentralised energy – including low carbon heat and power generation.
- ▶ Low carbon energy services and strategies.

We help organisations in Europe, North America and Asia understand and exploit opportunities in these markets. We work with senior decision makers in our major client groups: energy utilities, technology developers, oil & gas majors and policy institutions.

**What we do:** We provide our clients with analysis and insight based on deep market knowledge, delivering:

- ▶ Bespoke consultancy
- ▶ Research services and multi-client studies
- ▶ Summits

We cover sectors across the decentralised energy (DE) field as the graphic below shows:

Our goals are to be recognised as the world's best provider of research and analysis of DE and other low carbon energy markets - and to be a great place to work. For further information on our activities see [www.delta-ee.com](http://www.delta-ee.com).

## The Opportunity

Delta is seeking an **Analyst** who can play a key role in our consultancy and research services while supporting our future expansion and development. This is a substantial opportunity to:

- ▶ Become an international expert in specific DE sectors and low carbon markets.
- ▶ Advise leaders in the energy industry, the finance sector and governments around the world on how to exploit opportunities in these markets.
- ▶ Work in a stimulating, supportive and rewarding environment.
- ▶ Take growing levels of responsibility as Delta expands.

Responsibilities will include:

- ▶ Researching and delivering high quality consultancy assignments.
- ▶ Researching and producing high value multi-client studies and membership-based research services.
- ▶ Building relationships with industry contacts, developing client relationships and contributing to the development of new business.

## Requirements and Qualifications

Applicants should ideally have two or more years of relevant work experience, eg in the electricity sector (for example in retail energy services, strategy), energy consultancy, or with other direct DE-related experience (for example micro-CHP, heat pumps, microgeneration).

We may also consider those with more limited experience but who can demonstrate an exceptional track record of achievement in addition to outstanding potential.

You will be able to demonstrate:

- ▶ A high level of academic achievement, or a background of impressive achievement in your career to date.
- ▶ A profound desire for learning, becoming an expert and developing new contacts and networks.
- ▶ The confidence to apply a variety of research methods, including face-to-face and telephone discussion with industry experts and other professionals.
- ▶ Excellent writing, communication and organisational skills.

Fluency in a relevant second language is a strong advantage. Employees are sometimes required to travel within the UK and internationally.

## Salary and Benefits

We offer competitive salaries based on experience and qualifications. We offer 25 days holiday a year plus bank holidays, a contributory pension and a profit-related bonus scheme. The successful candidate will also be able to benefit in due course from the establishment of a Delta employee share scheme.

## Application

Please forward a CV and covering letter, outlining why you believe you are suitable for this role, by e-mail to [sarah.robson@delta-ee.com](mailto:sarah.robson@delta-ee.com) (or by post to Delta Energy & Environment, 15 Great Stuart Street, Edinburgh EH3 7TS, UK).
