

Micro-CHP Service

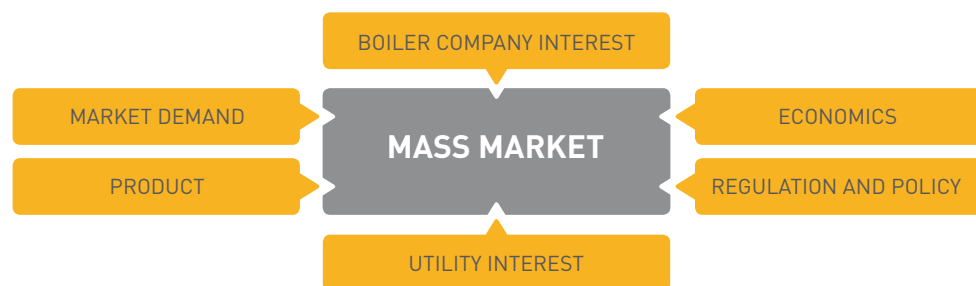

Micro-CHP Service

Leading European and global insight & analysis

- ▶ What are the winning utility and heating industry micro-CHP strategies?
- ▶ How are micro-CHP markets emerging – and how will they grow?
- ▶ Which products and technologies will win out?

Micro-CHP has the potential to be a game-changing technology, displacing boilers and generating as much as half of a household's electrical needs. Utilities, heating companies and micro-CHP developers need to pick the right strategies and tactics to ensure they successfully exploit opportunities and navigate threats. The Delta Micro-CHP Service, running since 2004, cuts through the noise to provide rigorous analysis and robust views to these companies.

Delta's research has a European focus with a global outlook.

Subscriber Benefits

- Delta's expert view on micro-CHP prospects
- Insight into utility & heating industry strategies
- Clear understanding of all micro-CHP product and technology developments
- Regular dialogue between Delta experts and Service subscribers
- Analysis and tracking of micro-CHP market status and developments

Major utilities, boiler manufacturers and product developers in Europe, Japan and North America subscribe. We help them develop their micro-CHP strategies, understand current and future market activity and track developments.

"In developing our micro-CHP activities, Delta's Micro-CHP Service provides us with excellent analysis of current and prospective market developments – and even more importantly keeps us on track with this very fast moving business"

Claude Cahen, Project Director, EDF Business Innovation

Service Deliverables

The Service covers micro-CHP with capacity 5 kW electrical and below, with a focus on the residential mass market. Deliverables comprise:

- Focussed research reports (and access to all previously published reports)
- Regular e-mail news and analysis
- Web-library of micro-CHP manufacturers and product developers
- Inquiry service – access to Delta's micro-CHP team
- Free attendance at Delta's annual 'Micro-CHP in Europe' Summit.

Other Delta Micro-CHP Services

Delta also provides on-site briefing and bespoke consultancy on micro-CHP and other aspects of decentralised energy and micro-generation.

Delta's annual 'Micro-CHP in Europe' Summit brings together major energy companies, boiler manufacturers and micro-CHP product developers. It is open to Service subscribers and selected other invitees.

"Excellent overview of m-CHP now and prospects for the future"

Claus Voight-Andersen, Topsoe Fuel Cell.

Why Delta?

We are international micro-CHP specialists

Micro-CHP is one of Delta's core areas of expertise: we are not a general energy market research organisation. We have deep and wide ranging relationships with micro-CHP players and influencers around the world.

We deliver rigorous and in-depth research

Delta's commitment to its clients is to deliver clear and concise information through rigorous, in-depth research. We cut no corners in providing insightful research and analysis.

We have a track record for delighting clients

Over two thirds of our work is repeat business. For a client list and further information about Delta, please visit www.delta-ee.com

Pricing and Contact
