

Analyst – Electric Vehicle Charging Service

Based in Edinburgh, Cambridge, London

The Opportunity

Delta-EE is seeking an **Analyst** to join our **Electric Vehicle (EV)** team. This is a great opportunity to become an international expert in the energy and mobility transition within a supportive and rewarding work environment.

Your role will involve:

- Conducting in-depth research on the rapidly evolving EV and EV charging sectors. This will include a variety of qualitative and quantitative research methods, including:
 - face-to-face and telephone discussion with industry experts and other professionals
 - secondary research, identifying and analysing data from other sources
- Managing and delivering engaging and meaningful content to our research subscribers in the form of reports, databases, and viewpoints.
- Communicating with clients or subscribers via presentations, email, webinars and by phone
- Developing your project management skills and / or leading projects
- Building relationships with industry contacts on behalf of the company, developing client relationships and contributing to the development of the business
- Becoming a thought leader, identify trends and sharing insight on EV charging topics.

Delta-EE's EV Charging Research Service

The EV Charging Research Service (EVCS) supports subscribers through the provision of market-leading insights, data, forecasts and market intelligence on the European EV charging sector. Existing subscribers are at the leading edge of the transition to electric transportation and include international energy companies, car manufacturers, oil & gas majors, network companies and investors.

The EVCS looks across four key pillars of the EV charging industry: Home Charging, Public Charging, Fleets, and Smart Charging. Our EV team is regularly publishing reports, market data and forecasts on each of these pillars, and conducting annual surveys of existing EV drivers across Europe.

The types of questions we seek to answer include:

- How are EV drivers charging their vehicles at home and on the move? What EV charging products and services are they using?
- How many chargepoints are installed today? How quickly will the market grow to 2030?
- What innovative smart charging propositions are being delivered to EV drivers?
- What propositions are being developed for electric fleets?
- How is public EV charging being retailed across Europe?

- What routes-to-market are being used to sell home wallboxes? How is this likely to change as the EV market matures in the next years?

Requirements and Qualifications

If you have the right skills for the job, we want to hear from you. We encourage applications from the right candidates regardless of age, disability, gender identity, sexual orientation, religion, belief, or race.

For this position, you will be able to demonstrate:

- Relevant BSc, MSc, PhD, or MBA qualifications and/or 1+ year's work experience in relevant aspects of the energy or transport sectors, working with (for example, but not limited to) energy companies, technology manufacturers, policy makers, 'start-ups' or industry associations would be an advantage.
- Interpersonal, organisational and project management skills.
- Writing, data analysis and presentation skills.
- Collaborative and team oriented working skills.
- Evidence of your ability to apply a variety of research methods, including face-to-face and telephone discussion with industry experts and other professionals.
- The ability to synthesise information and insight from a variety of sources, to create impactful research for our clients.
- A willingness to develop new industry contacts and clients and attend events where required.
- Commercial acumen - the ability to think commercially about the needs of our clients

About Delta-EE – Experts in New Energy

Delta-EE is Europe's leading research and consulting company helping organisations develop the right strategies, business models and customer propositions for the energy transition. The depth and breadth of our expertise in the energy transition space makes Delta-EE unique and our mission is to help our clients successfully navigate the change from 'old energy' to 'new energy'. We provide bespoke consultancy and subscription research services which answer critical questions that impact our clients' businesses and allow clients to access in-depth research in a specific knowledge area.
