

Energy Storage Analyst

Based in Edinburgh, Cambridge, London, or Paris

The Opportunity

LCP Delta is seeking an **Analyst** to join our **Energy Storage Research Service (ESRS)** team.

This will give you the opportunity to become a recognised expert in energy storage and engage widely with our research teams and research network.

Your role will involve:

- Conducting in-depth research. This will include a variety of qualitative and quantitative research methods, including:
 - face-to-face and telephone discussion with industry experts and other professionals
 - secondary research, identifying and analysing data from other sources
- Managing and delivering engaging and meaningful content to our research subscribers in the form of reports, databases, and viewpoints.
- Communicating with clients or subscribers via presentations, email, webinars and by phone
- Developing your project management skills and / or leading projects
- Building relationships with industry contacts on behalf of the company, developing client relationships and contributing to the development of the business

This is a great opportunity to:

- Become an international expert in low carbon distributed energy sectors and markets.
- Advise decision makers on how to exploit opportunities in these markets.
- Develop a wide range of research, analytical and advisory skills
- Work in a stimulating, supportive and rewarding environment.
- Take growing levels of responsibility as the service expands.

LCP Delta's Energy Storage Research Service (ESRS)

The Energy Storage Research Service (ESRS) looks into the energy storage market in Europe, with a focus on large-scale storage. The service provides information on where and how storage is deployed, what are the companies active in the storage market in Europe and what are the business models being used. We help clients understand the market, which markets they should play in, what their competition is doing and who to form partnerships with. Clients include utilities, product manufacturers, project developers and optimisers.

What we are looking for

If you have the right skills for the job, we want to hear from you. We encourage applications from the right candidates regardless of age, disability, gender identity, sexual orientation, religion, belief, or race.

For this position, you will be able to demonstrate:

- Relevant BSc, MSc, PhD, or MBA qualifications and/or 1+ year's work experience in relevant aspects of the energy or transport sectors, working with (for example, but not limited to) energy companies, technology manufacturers, policy makers, 'start-ups' or industry associations would be an advantage.
- Interpersonal, organisational and project management skills.
- Writing, data analysis and presentation skills.
- Collaborative and team oriented working skills.
- Evidence of your ability to apply a variety of research methods, including face-to-face and telephone discussion with industry experts and other professionals.
- The ability to synthesise information and insight from a variety of sources, to create impactful research for our clients.
- A willingness to develop new industry contacts and clients and attend events where required.
- Commercial acumen - the ability to think commercially about the needs of our clients

About LCP Delta – Experts in New Energy

Founded in 2004 and based across the UK, France, Norway, the Netherlands and beyond, LCP Delta provide data-driven research, consultancy, technology products and training services to companies investing in and navigating the energy transition.

LCP Delta was formed through the merger of Delta-EE and LCP Energy to bring together deep generation and consumer-side expertise, to provide our clients with a single partner to help them on their journey and provide them with a 360° view across the energy spectrum.

We are a diverse team from a variety of backgrounds including engineers, data analysts, environmentalists and more. All of us want to make a difference to the energy transition and accelerate the path to a low carbon future.

What is in it for you?

Creating a great company culture and being a place that people love to work is very important to us; we are a collaborative, inclusive and friendly team.

As well as joining a fun, collaborative, and people orientated organisation where your personal and professional skills will be developed to make you the best you can be, we offer an attractive

benefits package designed to promote your overall wellbeing so that you are able to perform to your full potential both in and out of work.

We continuously strive to build an inclusive workplace where all forms of diversity are valued, including age, background, disability, gender, gender identity, gender expression, race, religion, or sexual orientation.

Application

If you wish to apply, please do so as soon as possible by submitting your CV and a short covering letter (less than 250 words) via our careers page: www.delta-ee.com/about-us/careers/
